

CHROMATOGRAPHY SOLUTIONS

PRODUCT OVERVIEW

SCION Instruments specialise in premium Gas and Liquid Chromatography solutions for research and industry.

This brochure will help you understand our product range and the benefits our instruments can offer your lab.

Company Overview

SCION INSTRUMENTS GAS & LIQUID CHROMATOGRAPHY SOLUTIONS HELP YOU BOOST PRODUCTIVITY AND GENERATE DATA CONFIDENTLY.

Built on the history of Chrompack and Varian in GC and GC-MS, SCION Instruments was acquired by the Techcomp group in 2014.

SCION Instruments designs, develops, supplies and supports GC, GC-MS, LC and Compass CDS (chromatography data system) product lines.

The company prides itself for manufacturing in Europe at facilities in Goes, The Netherlands with its headquarters based in Livingston, Scotland.

SCION Instruments maintains a global infrastructure to support sales around the world. As well as providing support for SCION Instruments customers, there is also service and support available for users of legacy Varian systems.

A Techcomp Company

Founded in 1988, Techcomp Instruments Ltd is a laboratory instrumentation group headquartered in Hong Kong.

Techcomp engages in Development, Manufacture and Distribution of Scientific Instruments globally.

Our core technologies include Molecular Spectroscopy, Mass Spectroscopy, Chromatography and General Laboratory Instrumentation.

Techcomp Europe Ltd, based in the UK, comprises a group of European companies with operations dating back to 1920.

As well as SCION Instruments, the Group consists of Dynamica, Edinburgh Instruments, Edinburgh Sensors, Froilabo, Isotopx and Precisa.

Gas Chromatography

Model GC 8300

- Compact footprint of only 32 cm (12.6") wide
- Fast ramping oven (170°C/minute)
- Two channel architecture, with up to 2 injection ports and 2 detectors (including MS)
- 10" High resolution full-colour touchscreen, 16 languages supported
- Electronic flow control (EFC), 3 channels 0.001psi resolution
- Full automation capabilities through CompassCDS software and autosampler

Model GC 8500

- Ultimate flexibility/configurability.
- Fast ramping oven (150°C/minute)
- Three channel architecture, with up to 3 injection ports and 4 detectors (including MS)
- 10" High resolution full-colour touchscreen, 16 languages supported
- Electronic Flow Control (EFC), up to 21 channels at 0.001psi resolution.
- Flexibility to add samplers, valves, valve oven, backflush and column switching capabilities, etc. Programmed and controlled through CompassCDS

Standard Analyser Solutions

Solutions

- Simulated Distillation
- Detailed Hydrocarbon Analyser
- TOGA
- Biodiesel
- Refinery gas & Natural Gas Analysers
- Beer
- Greenhouse gases

Solution Features

- Designed, Tested and Documented
- Method compliance
- Application Guaranteed

Custom Solutions: Configured for your Application

Capabilities that make a difference

- GC systems that are configured and tested for specific customer requirements
- Configuration provided with custom factory modification
- Testing performed by factory in accordance with customers request
- Multi Valve Oven for extra heated zones
- Unique Sample Pre-concentration trap & PFPD detector for PPT LoD

High Performance Liquid Chromatography

SCION LC6000

- Extra-large solvent cabinet
- Quaternary pump
- Autosampler
- Manual Injector
- Column oven with Peltier
- Full portfolio of detectors (DAD, UV, RI, FL)

Solution Features

- Superior retention time stability
- Excellent flow rate precision
- Ultra-low carry over
- IQ/OQ

Mass Spectrometry

8700 SQ GC-MS

Scion MS Detector for 8X00 *

- Lens free analyser ion path
- Axial ion source
- Active focusing Q0 pre-filter
- Full automation capabilities through MS Workstation software and autosampler

Specifications & Features

- Available with EI or CI ion source
- Mass range (m/z) 1 to 1200Da
- Scan rate up to 20,000 Da/s
- Resolution 0.7Da (unit) to 2Da & 4 Da
- 160kHz detector data acquisition rate
- User adjustable custom resolution settings
- Extended dynamic range (EDR) > 105 range
- MSWS control software with built-in compound library
- Users can build and add customised libraries
- Easy access maintenance and cleaning

Model 8900 TQ GC-MS

- The SCION 8900 TQMS delivers the fastest scan rates (30,000 Da/s) of any comparable system.
- Improved MRM speed (1000 MRM/s) pushes the envelope on data capture to new levels
- Included is a high-performance turbo pump for rapid time to vacuum and worry-free operation
- Dual filament source increases uptime
- Best sensitivity in positive ion MRM mode (100 fg OFN for 272>222: S/N> 50,000:1)
- Six orders of magnitude dynamic range (EDR)
- Extensive mass range (1-1200)
- Mass resolution of 0.7-4Da with mass stability of 0.1Da over 48h
- Innovative lens-free ion path delivers simplified tuning
- Off axis source and detector increase sensitivity

Both variants offer...

- Dual injector access
- Dual or duplicate injection capability
- Three solvent wash
- Sample tray heating or cooling
- Large solvent vial, Flowcell, SPME options

Sampling

8400 PRO Autosampler

- Capacity = 100 x 2mL vials
- Wide variety of syringes
- Dual injection access

8410 PRO Autosampler

- Capacity = 10 x 2 mL + 6 x 5mL + 5 x 10mL vials
- Flow-through cell for continuous sampling
- Maximum flexibility in vial size

Compass CDS

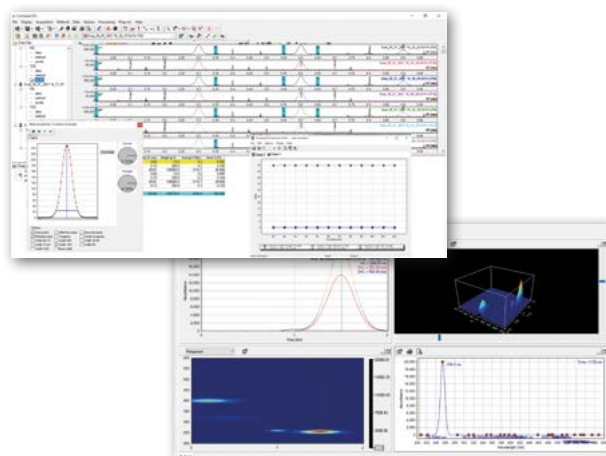

Industry Proven

CompassCDS is an industry-proven, powerful and operator friendly networked chromatography data system software solution developed throughout the last 20 years according to requirements of our customer base. With its intuitive, easy-to-use and application and information-rich user interface and its unique capacity for customization, CompassCDS provides operators with a powerful tool for a variety of operations in different analytical fields. Multi-language support.

Simply Powerful!

- Application-rich, configurable and intuitive UI
- Multi-vendor GC & LC instrument control
- Application specific tools - *1-Button interface, Validat, ChromSync, Hydrocarbon Reporting Tool, Sample Streamer, Eclipse DHA/SIMDIS*
- Unreached integration engine performance and precision
- Comprehensive calibration, calculation and reporting tools
- Centralised system administration and data management
- Robust design for 24/7 operations
- Scalable; from workstation to enterprise-wide C/S installations
- Complies to 21CFR11, ISO EN 17025
- Multi-language support

Static Headspace

Versa Automated Headspace Vial Sampler

- Small on size but big on value. Only 12" wide
- 20-position autosampler/single position platen oven
- 22mL vials
- Sample heating to 200°C throughout pathway
- Built-in pressure control to ensure consistent volume for all samples regardless of external conditions
- Inert sample pathway including transfer line, sample needle, and loop provides superior analytical results by eliminating adsorption and reducing carryover
- Automatic leak check and Benchmark test for quick troubleshooting
- Simple method development using Method Optimization Mode (M.O.M.)
- Versa TekLink™ 2G software for use as standard or full 21 CFR compliance

HT3 Static and Dynamic Headspace System

- Standard integrated 60-position autosampler with 10-position platen heater provides true walk away automation
- Increased sensitivity from 50 to 100 times with the Dynamic Headspace option (compound dependent)
- Removable sample path for trouble-free maintenance
- High temperature capability to 300°C expands range of applications
- Inert sample pathway including transfer line, sample needle and loop provides superior analytical results by eliminating adsorption and reducing carryover
- Automated Leak Check and Benchmark for quick troubleshooting
- Automated method development using Method Optimization Mode (M.O.M.)
- 21 CFR Compliance
- Built-in Mass Flow Controller ensures consistent flow and pressure for all samples regardless of external conditions
